---

## Work experience

---

Junior help desk support

*Paradyn*

I supported the help desk team in a variety of tasks, this ranged from the installation of Windows 10, to troubleshooting hardware and software related issues.

IT Contractor

*Paradyn*

I was assisting in set up and installation 15+ computers to an existing network. Logging in and making sure all users would be connected to the internet.

2008 - 2012

*Qwerty Technologies*

I helped my dad in his company to build computers from components and to install the software. I also learned how to troubleshoot network equipment and how to fix broken components.

---

## Interests

---

An individual who is fond of blogs about the internet and new technologies, and how these new technologies can be applied in the workplace. Modifying games (e.g. [Minecraft](#)) is another interest of mine, with the aim to make it better and easier for the player. Strategy games such as [World of Tanks](#), I find enjoyable because I need to be able to think ahead of the other players, and still be able to make quick decisions if the need arises. Currently cycling to and from college, and on weekends when the weather permits. During my free time I enjoy photography, and consider myself to be a amateur photographer ([Photography portfolio](#)).

---

## Achievements

---

- While in South Africa I was actively involved in the [Go-Gabi](#) charity helping to fundraise and assist where possible for my disabled sister, who is wheelchair-bound.
- While in high school I was in involved in the preservation society. We went to the animal shelter and collected food for homeless people.
- During high school in South Africa I received an award for service to the school. To receive this reward you needed a minimum of 120 hours. Another award I received was for being the top student for my computer class and for being the top photographer - 2015 & 2017
